

Linux内核编程11期：设备树（device tree）

本文档配套视频讲解: <https://wanglitao.taobao.com>

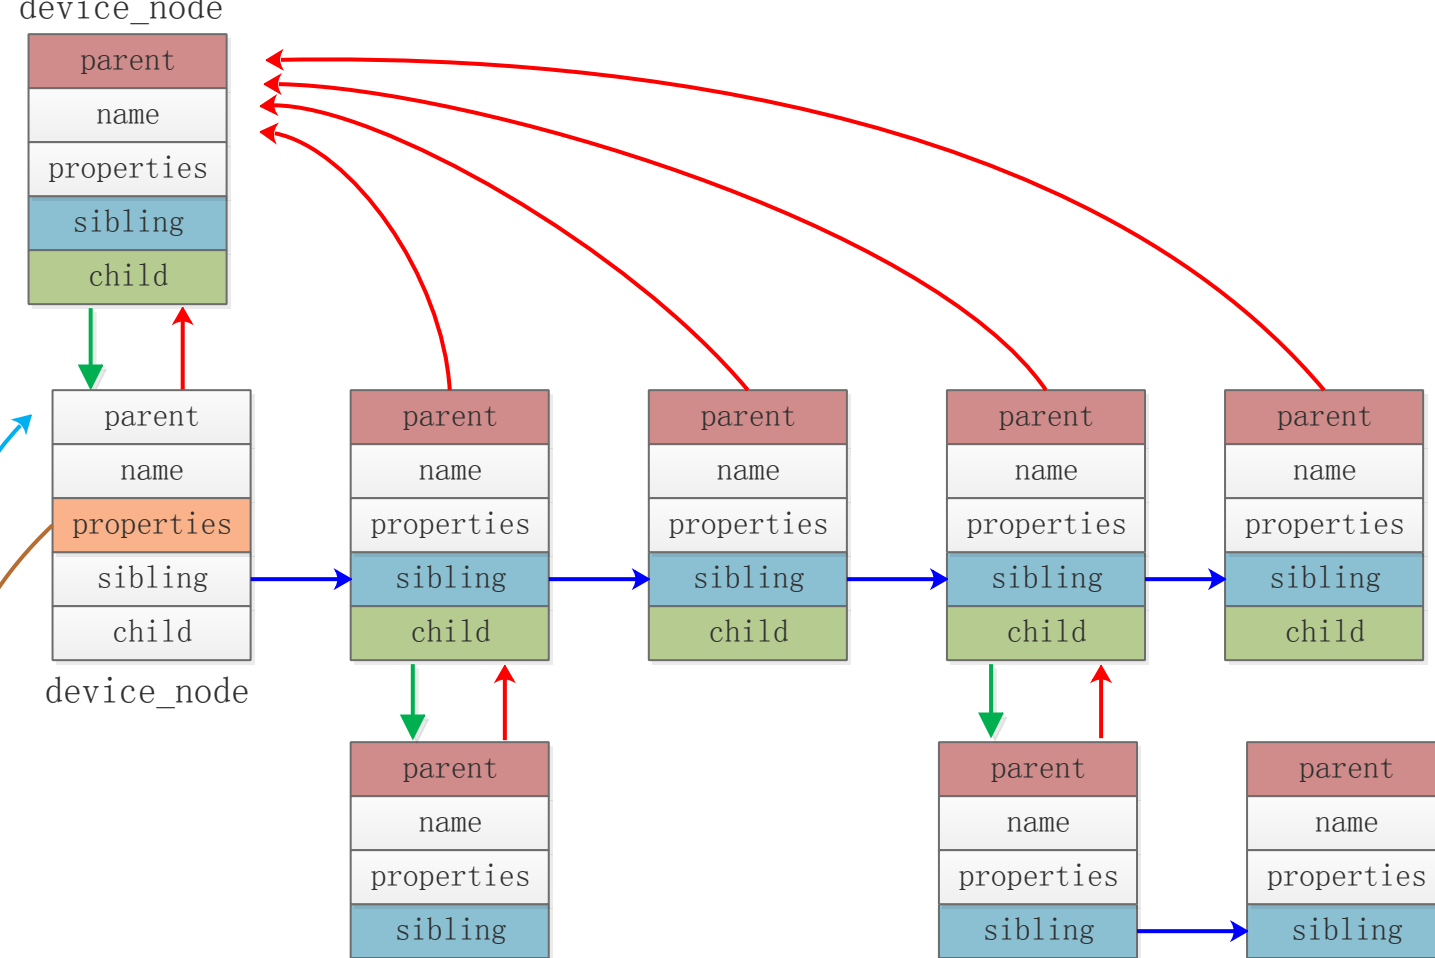

毛字部落，嵌入式字习社区：www.zhaixue.com

handle\0	...
----------	-----

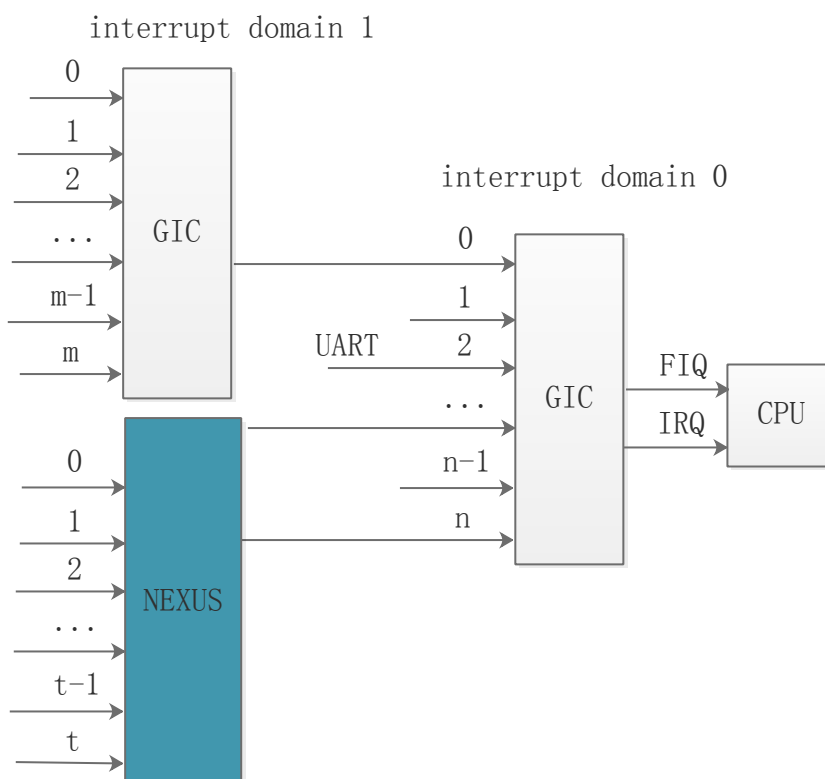

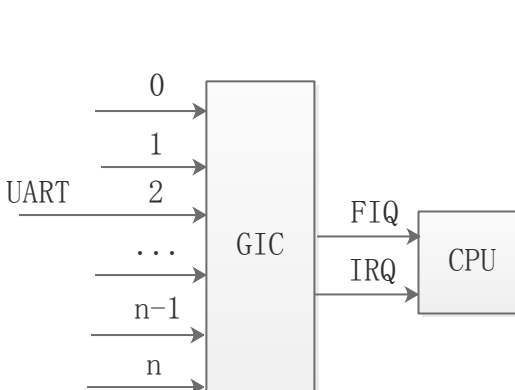

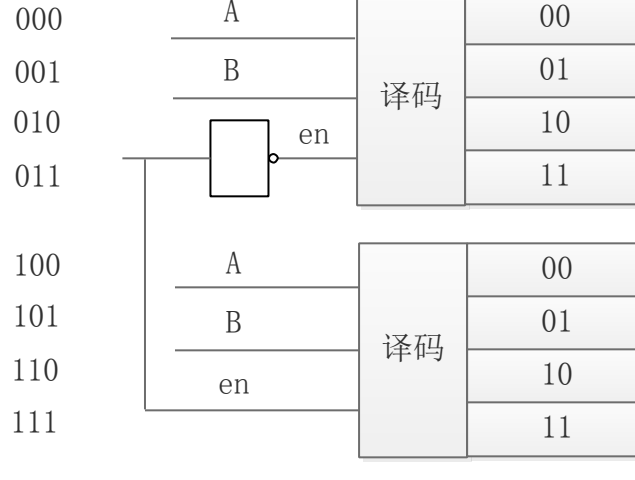

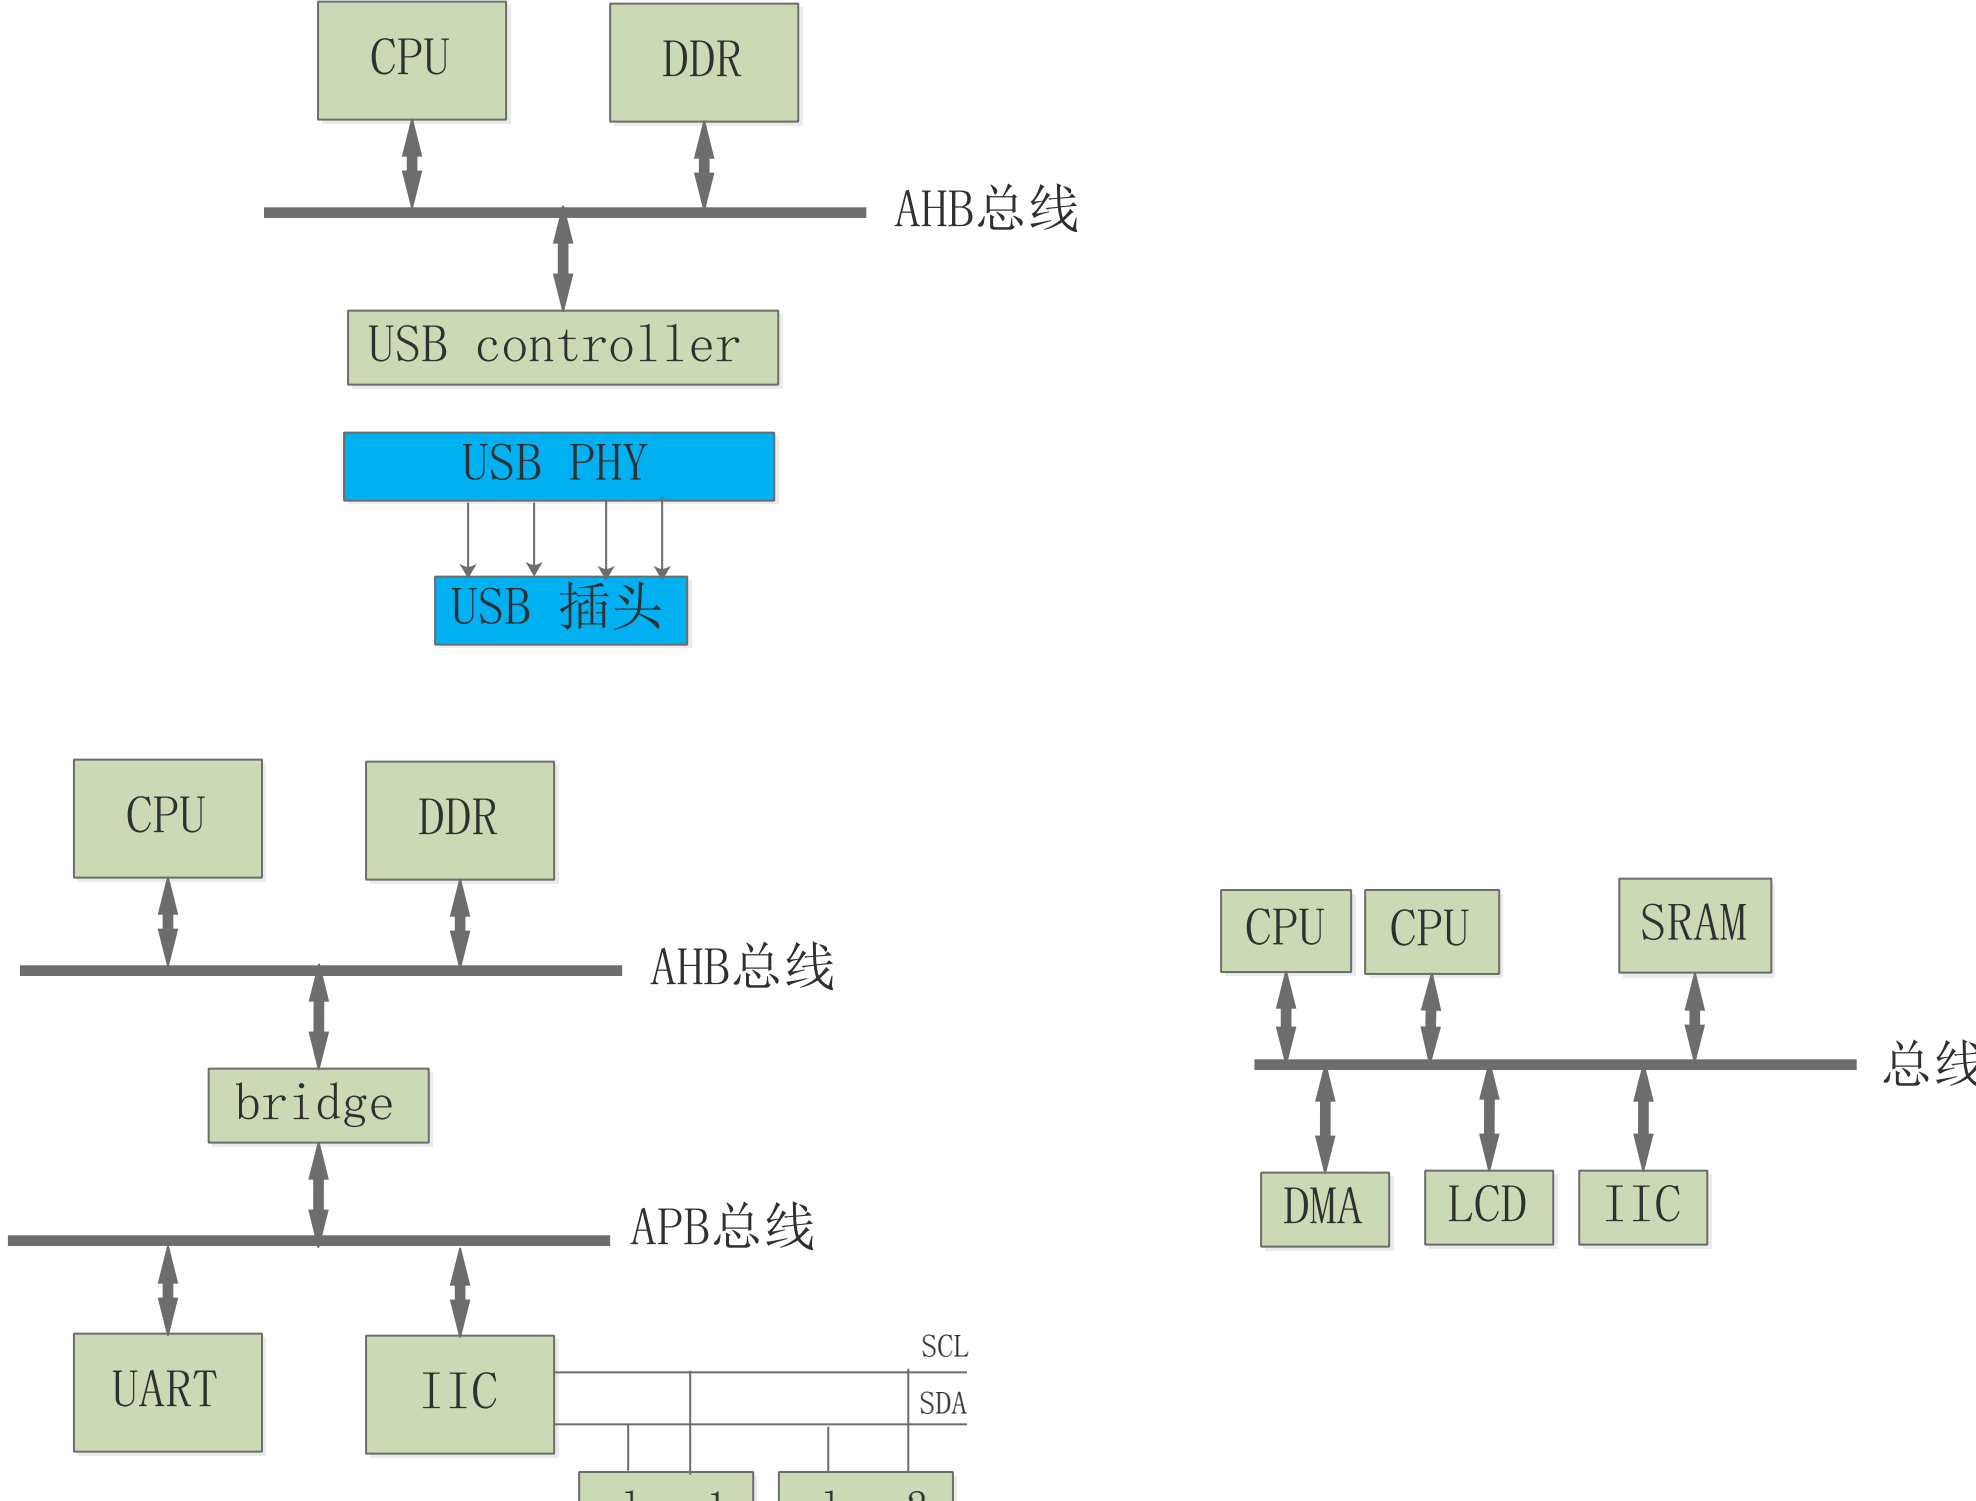

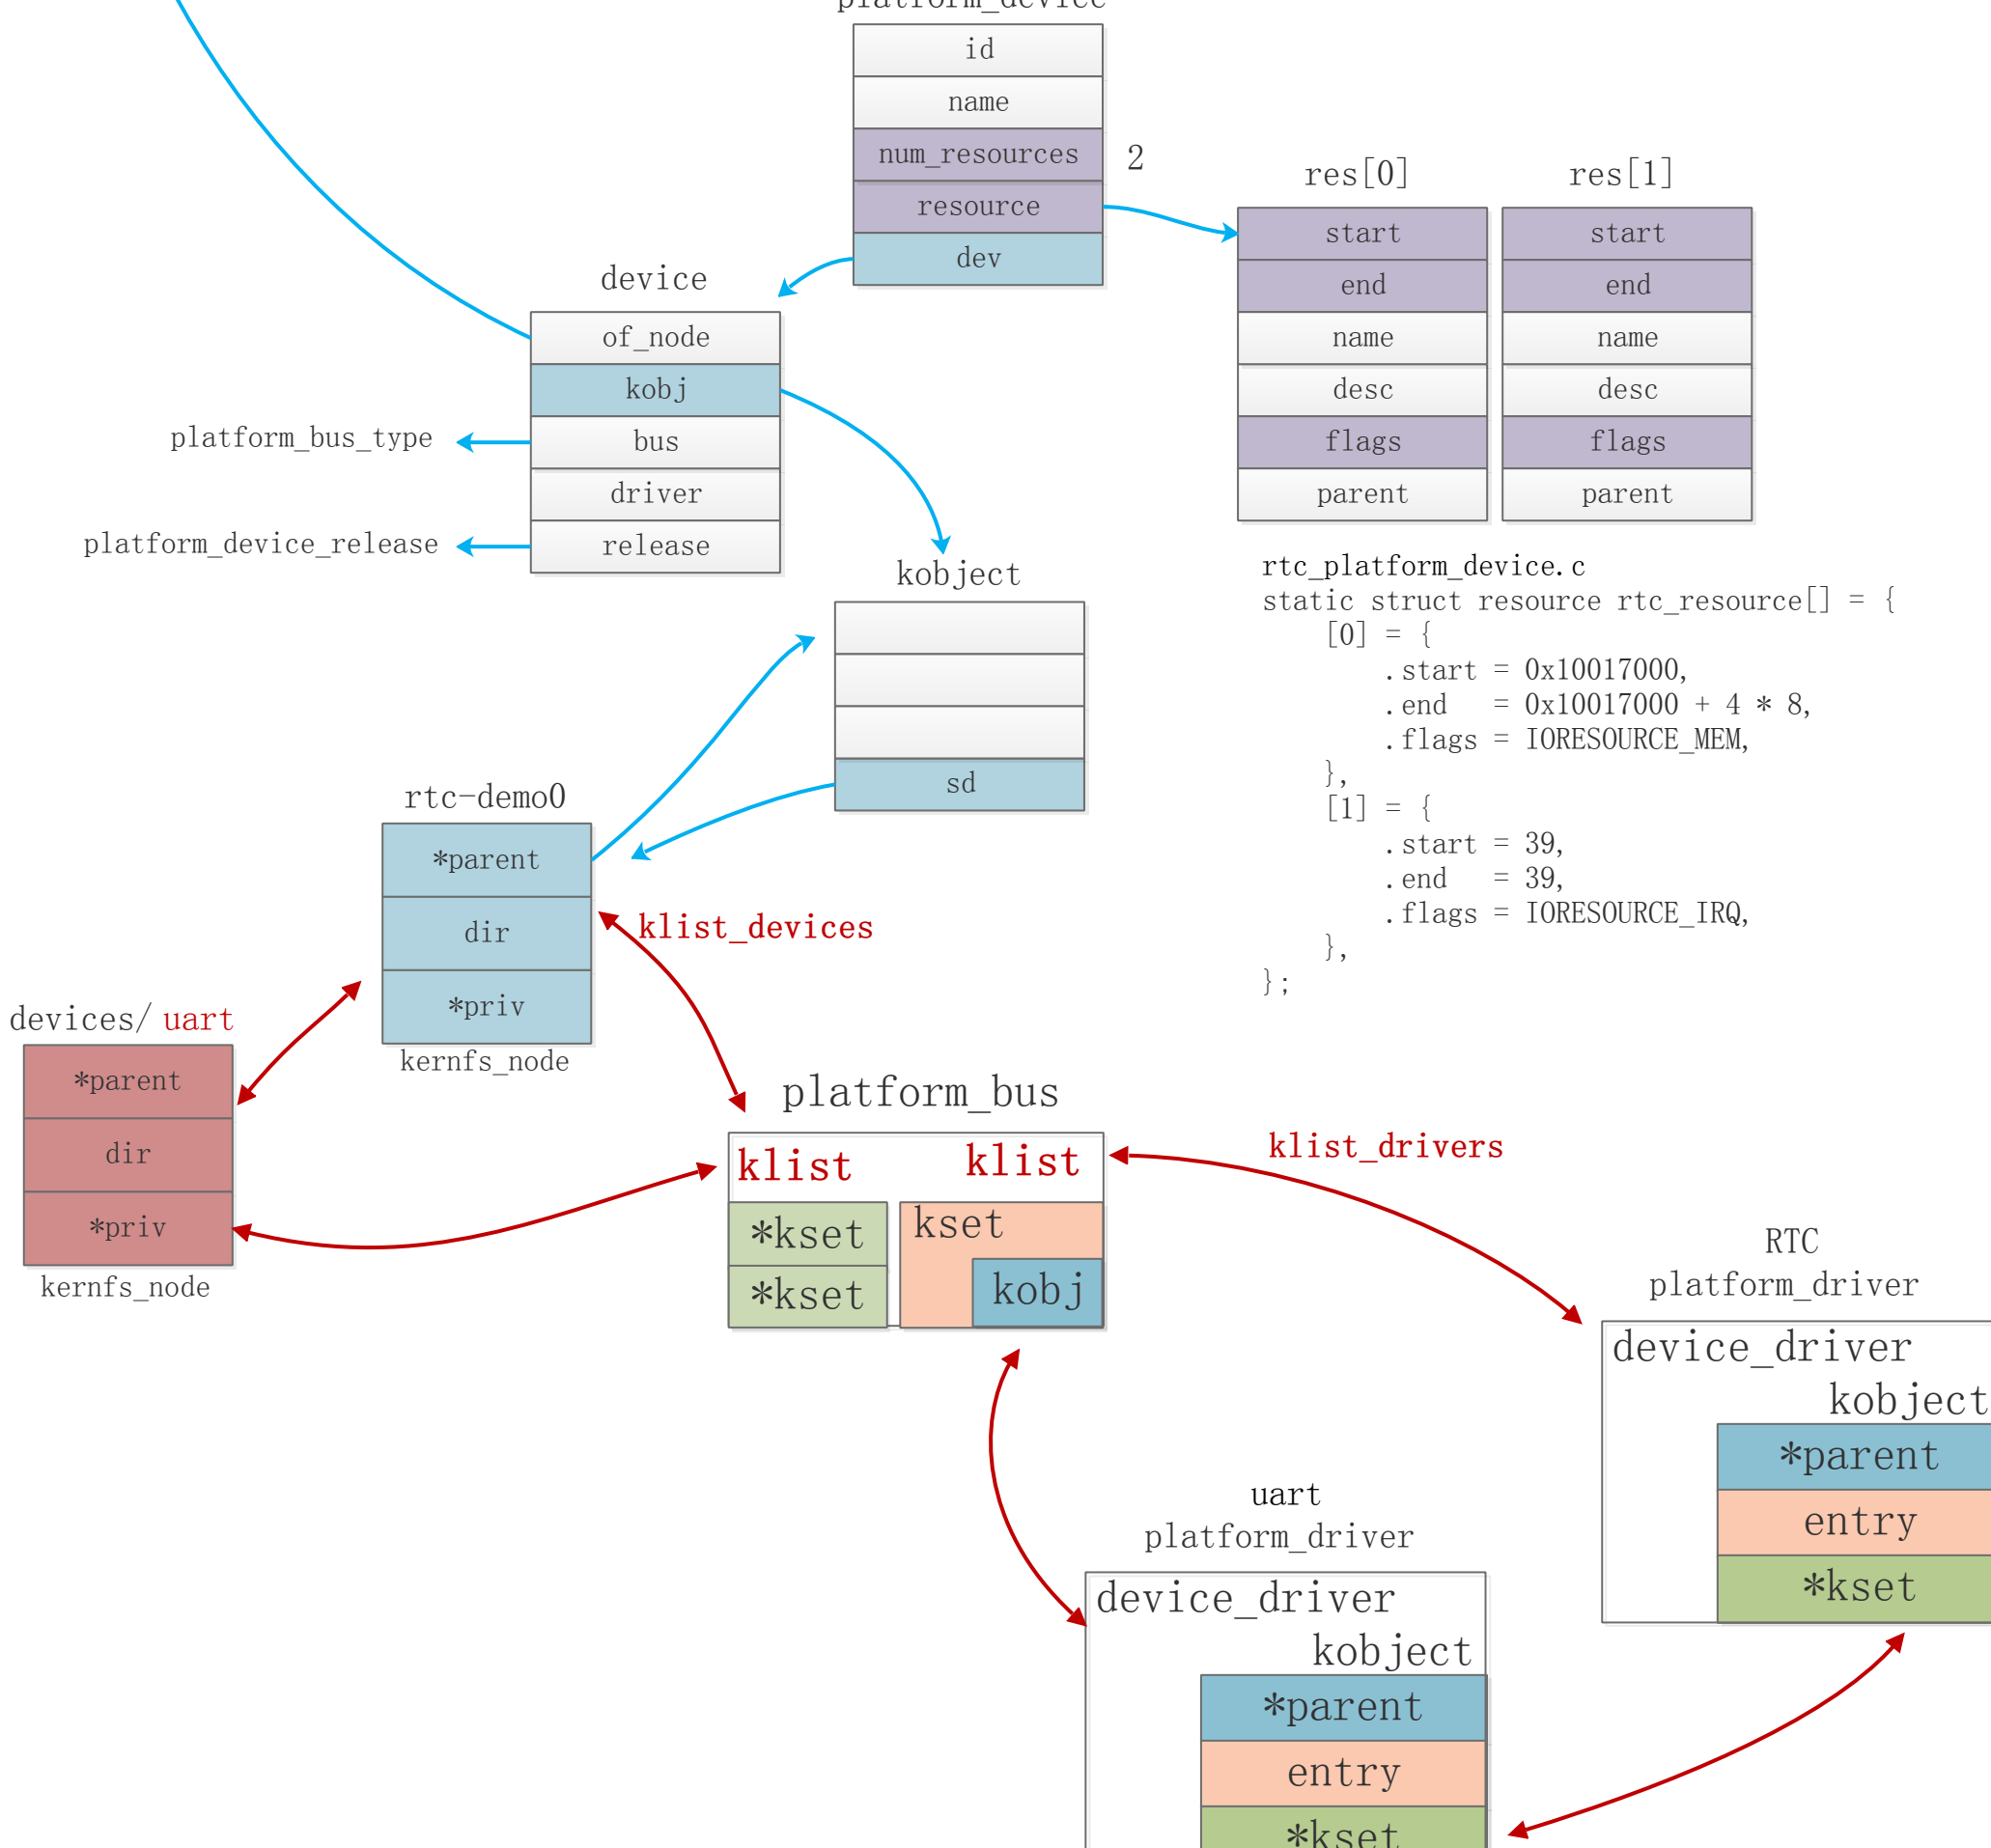

添加一个新节点

```

/* reg1000 {
    compatible = "arm,p1031", "arm,primecell";
    reg = <0x17000 0x1000>;
    interrupts = <4>;
    clocks = <&smbclk>;
    clock-names = "apb_pclk";
};
*/
```

将device_node展开为platform device
